User Interviews & Testing

EXPERIENCE

Student Web Developer

UCSD IT Services   July 2016 - June 2017

- Created, edited, and QA tested web pages for numerous departments within UCSD using Cascade Server CMS.
- Created a mobile-responsive marketing page for the new UCSD mobile app using HTML5, CSS3 and JavaScript.

Tutor

UCSD CSE Department   Jan 2015 - June 2016

- Provided assistance for students during designated weekly lab hours.
- Graded and provided feedback to students' assignments.

PROJECTS

UI/UX Designer | Front-end Developer

RoadRunner   April 2017 - June 2017

- Used Google Maps API, Handlebars, and Skeleton to create a mobile-responsive web app that allows users to map and route paths between a list of destinations.
- Created storyboards & paper prototypes and went through weekly iterations of user testing to guide our design process.

Front-end Developer

ActorDex   Jan 2017 - March 2017

- Used Vue.js, Bulma CSS, and Firebase to create a mobile-responsive site for users to view a collection of actors & actresses, add/edit the information, and save their favorites.

UI/UX Designer | Front-end Developer

Bucket   July 2016 - June 2017

- Used React, Express and MongoDB to create a web app that allows users to add activities from Yelp and organize them into collaborative bucket lists with their friends.
